Type: **Invited talk**

The science and technology of metamaterials

Tuesday, 30 August 2022 14:50 (20 minutes)

Metamaterials and nanoplasmonics bridge the gap between conventional optics and the nanoworld. Exciting and technologically important capabilities range from subwavelength focusing and stopped light to invisibility cloaking, with applications across science and engineering from biophotonics to nanocircuitry. In the talk, we shall present past and recent advances in this exciting field, underscoring important current trends that may lead to improved active imaging, ultrafast nonlinearities on the nanoscale, and topological rainbow trapping.

Primary author: Prof. TSAKMAKIDIS, Kosmas L. (Section of Condensed Matter Physics, Department of Physics, National and Kapodistrian University of Athens, Greece)

Presenter: Prof. TSAKMAKIDIS, Kosmas L. (Section of Condensed Matter Physics, Department of Physics, National and Kapodistrian University of Athens, Greece)

Session Classification: RT3 YM Roundtable – Career in Physics

Track Classification: Round Tables: RT3 YM Roundtable – Quantum and New Technologies
